Executive Summary

Since establishment in February 1998 Total Project Solutions (TPS) has worked collaboratively with our clients to create inspirational environments, empowering the 'end user' to function efficiently and safely.

TPS is a privately owned equal opportunity company, where the key stakeholders are involved with all facets of project delivery from inception to occupancy.

Critical decisions can be made immediately to ensure we meet our contractual obligations and accommodate any changes to scope or project delivery.

TPS facilitate a diverse range of projects including modular construction, interior fitout, building refurbishment and new construction, however we are selective in the type and value of projects we undertake.

TPS has an extensive history of successfully completing projects in operational and shared environments including Universities, Schools, Hospitals, Multi-Story Offices and Government Buildings.

Our recent project portfolio includes Science & Research Facilities, Educational Environments, Laboratories, Hospital & Healthcare Refurbishments. Isolation Rooms, Covid Clinics, Negative Pressure Facilities.

Specialising in Healthcare, TPS is a builder of choice for many organisations and have completed multiple projects for; St John of God Hospitals, Sir Charles Gairdner Hospital, Bethesda Private Hospital, PathWest, Fresenius Kidney Care, Fiona Stanley Hospital, North Metro Health Service. East Metro Health Service, Wexford Medical Centre, Perth Children's Hospital & Hollywood Hospital.

Our purpose is to deliver a safe workplace with Zero harm to people or environmental damage.

Our Services

TPS services are conducted ethically and professionally, providing you with the highest quality and value service that continues long after the project has been completed.

TPS is a member of the Master Builders Association and meets best practice in the industry under the MBA code of ethics.
